OUR FOCUS

Building presentation skills

The ability to coherently express ideas is a fundamental skill. In our winter camp we create an encouraging environment for our students to build confidence through presenting their day's work.

Technological fluency

The presence of technology in our lives is only increasing. We offer the opportunity for students to interact with many different apps, programs and devices to allow them to develop the ability to manipulate and utilize these platforms in any and all situations.

And having fun!

STEAM is the key for global leaders and "change makers" in the era of AI. At our camp, students are able to learn STEAM through fun games and activities.

Coding cool robots, exploring the metaverse and 3D art through VR — these are just a few of the activities we offer!
